The ABIME Board of Registry

Upon certification, physicians are eligible for membership in the Board of Registry

The ABIME Board of Registry consists of Certified Physicians who pay an annual fee of \$185 to qualify for the following menu of Activities, Programs, and Services.

Activities, Programs, and Services:

ABIME is committed to keeping its members up to date in disability medicine by providing programs and services that foster professional development throughout their careers. The following is a partial list of informational and educational tools that keep member physicians at the top of their profession. All benefits, including subscriptions to publications, are activated upon receipt of the annual Board of Registry payment.

- **Members of the Board of Registry are eligible for the Alternate Pathway Recertification Program.**
- **Listing in the Print Directory and listing in the Directory online at www.abime.org.**
- **A subscription to DISABILITY MEDICINE- the quarterly journal of the American Board of Independent Medical Examiners.**
- **Discounted rates on ABIME education programs.**
- **Special insurance programs.**
- **New developments in programs including the Advanced Topics, Expert Witness, and Report Writing Seminars.**

Your colleagues are saying...

"Physicians who have excellent clinical skills in combination with a discerning understanding of the unique issues involved in a functional restoration/return to work, and are willing to document their findings and opinions objectively, are of great value to all parties involved. ABIME certification implies an enhanced level of understanding of these important components".

Karen M. Wiede, RN, BSN, CCM, VP, Business Development Medical Legal, Best Doctors, Inc.

"I am more confident about doing quality evaluations and reports. In three months, my referral base doubled. The biggest problem I have is the waiting list!"

Rick Zabrodski, MD, CIME, Alberta, Canada

"As a result of my certification by ABIME, new clients requiring IMEs have sought out my services and have enhanced my referral base. I recommend the ABIME certification process."

Harvey Goldberg, MD, CIME, West Bay Shore, New York

The insurance industry is increasingly turning to ABIME-certified physicians to assist them with difficult cases:

"ABIME recognizes the need for very high quality Independent Medical Exams and has created a useful and practical process for physicians to develop and enhance the requisite knowledge base and skill sets."

Mark E. Battista, MD, Medical Director, UNUM Life Ins. Co. of America, Portland, Maine

"We are most interested in a timely, fair, and accurate independent medical evaluation and impairment rating. Training and examiner accreditation will help achieve the consistency we demand."

Barton G. Margoshes, MD, Vice President, Liberty Mutual Group, Medical Director, Risk Services, Boston, Mass.

"The need for trained physicians who understand the requirements for managing disability and focusing on the return to work aspects for medical delivery is a significant value to the industry."

Lester L. Sacks, MD, PhD, President, Medical Management Services Travelers Property Casualty Corporation, Hartford, Conn.

What You Need to Know About ABIME

The prestigious distinction of certification through the American Board of Independent Medical Examiners (ABIME) sets you apart as a nationally recognized medical examiner. ABIME certification represents professional competency and integrity. Physicians certified by ABIME meet the demand for quality, impartial impairment and disability evaluations. **ABIME has certified over 3000 physicians since 1996. ABIME certification is recognized as the national standard for physicians performing IMEs.**

ABIME meets today's challenges for independent medical examiners

Expectations for highly qualified medical examiners have never been greater. Insurance companies, workers' compensation commissions, employers, and attorneys are continuously engaging independent medical examiners to assess challenging cases.

Workers' compensation and other disability costs total billions of dollars every year. As a result, cost-conscious organizations are closely scrutinizing medical providers. The needs of healthcare organizations, disability managers, employers and insurers have changed dramatically over the last decade. Biased, inadequate and superficial medical examinations are unacceptable in today's competitive marketplace.

The American Board of Independent Medical Examiners addresses the need for competent, reliable disability/compensation evaluations. Key leaders within the medical, legal and disability management communities established ABIME to:

1. Set and maintain high standards of conduct and performance among independent medical examiners
2. Identify and promote qualified individuals who meet these standards

ABIME is incorporated as a national quality assurance board. It ensures uniformity of standards and competency of physicians performing independent medical and disability examinations. ABIME's board of well-known experts from multiple disciplines regulates its application and examination process to identify qualified independent medical examiners.

How ABIME certification advances your career:

ABIME certification offers you a competitive advantage over non-certified physicians. Today, industry experts view certified independent medical examiners as better qualified to respond to the needs of case and claims management.

ABIME requirements for knowledge, skills and abilities qualify physicians to:

- ◆ Conduct superior, independent medical examinations
- ◆ Write comprehensive, accurate reports
- ◆ Interpret relevant workers' compensation and disability law
- ◆ Provide credible, defensible testimony

As an ABIME certified independent medical examiner, your credentials and advanced knowledge bring you:

- ◆ Significant recognition among your peers
- ◆ Added credibility with prospective clients
- ◆ Increased referrals and case assignments
- ◆ Greater practice and career expectations

ABIME certification is a special distinction that sets you apart as one of the best in the field.

Your achievement instills greater client confidence in your capabilities and professionalism, and identifies you as an experienced physician who understands the unique issues of disability evaluation.

Qualifying for ABIME certification

ABIME certification is granted to physicians who successfully achieve the following criteria:

- ◆ Continuing medical education in the performance of independent medical examinations and disability and impairment evaluation
- ◆ A selective application process meeting standards of education, experience and ethical conduct
- ◆ A signed agreement to abide by professional guidelines of conduct
- ◆ A competency examination covering such key aspects as clinical competency, behavioral science, impairment and disability systems, and the *AMA Guides to the evaluation of Permanent Impairment*
- ◆ Recertification is required every 5 years

The American College of Occupational and Environmental Medicine (ACOEM) and the American Board of Independent Medical Examiners (ABIME), and others sponsor impairment and disability evaluation courses that meet the ABIME education requirement.

Why choose an ABIME-certified physician?

The need for qualified medical evaluations continues to increase. ABIME certification provides value to physicians and a variety of clients including claims adjusters, case managers, employers, commissioners and attorneys. Certification identifies the physician as someone who:

- ◆ possesses necessary medical skills and training in physical, behavioral, psychological and occupational assessment
- ◆ draws upon in-depth experience to perform credible evaluations
- ◆ provides a thorough, objective, written analysis regarding diagnosis, causation, prognosis, maximal medical improvement, impairment, work capacity, appropriateness of care and case management
- ◆ demonstrates skills in testifying as an expert medical witness
- ◆ recognizes the value of impartiality and thoroughness in case evaluation
- ◆ strives to conduct timely, cost-effective evaluations
- ◆ abides by ABIME guidelines of conduct and ethical practice

- ◆ exhibits commitment to professional excellence and integrity as a member of a select group of physicians

Certified independent medical examiners are an essential resource for all types of disability management professionals. Their impartial and thorough assessments enhance the evaluation process and produce beneficial results for all involved, including the examinee. ABIME certified physicians are specially prepared to:

- ◆ clinically assess cases of disability
- ◆ identify relevant physical, behavioral, psychological, psycho-social and occupational issues
- ◆ obtain medical information that may have been overlooked
- ◆ clarify issues of causation and apportion responsibility
- ◆ perform accurate impairment evaluations according to the *AMA Guides to the Evaluation of Permanent Impairment*
- ◆ assess work ability
- ◆ make recommendations about case management

ABIME certification singles out exceptional independent medical examiners dedicated to performing quality evaluations and recognized for their unique qualifications.

Added Benefits of ABIME

Certified physicians can choose to be listed in an annual ABIME National Directory of Certified Independent Medical Examiners available to prospective clients and organizations. The complete directory is available in an interactive database at www.abime.org. The national ABIME awareness campaign recognizes and promotes the expertise of ABIME-certified physicians.

Guidelines of Conduct

Each physician certified by the American Board of Independent Medical Examiners (ABIME) is expected to comply with these guidelines of conduct:

Accordingly, each physician should:

1. be honest in all communications;
2. respect the rights of the examinee and other participants, and treat these individuals with dignity and respect;
3. at the examination:
 - a. introduce him/herself to the examinee as the examining physician;
 - b. advise the examinee they are seeing him/her for an independent medical examination, and the information provided will be used in assessment and presented in a report;
 - c. provide the examinee with the name of the party requesting the examination;
 - d. advise the examinee that no treating physician-patient relationship will be established;
 - e. explain the examination process;
 - f. provide adequate draping and privacy if the examinee needs to remove clothing for the examination;
 - g. refrain from derogatory comments; and
 - h. close the examination by telling the examinee that the examination is over and ask if there is further information the examinee would like to add;
4. reach conclusions that are based on facts and sound medical knowledge, and for which the independent medical examiner has adequate qualifications to address;
5. be prepared to address conflict in a professional and constructive manner;
6. never accept a fee for services which is dependent upon writing a report favorable to the referral service; and maintain confidentiality consistent with the applicable legal jurisdiction.

Medical Doctor Application Information

Eligibility

Each applicant for certification as an independent medical examiner is required to meet specific eligibility requirements and satisfactorily complete a written examination. Eligibility criteria are determined by the American Board of Independent Medical Examiners (ABIME) Board of Directors. Recertification is required every five years. Certified physicians are required to pay a fee of \$185 each year to be listed on the ABIME Board of Registry. The Board of Registry benefits include receipt of the Quarterly Journal “*Disability Medicine*”, the physician’s listing in the print and online directories, discounted rates on ABIME Education Programs, and special insurance programs.

These requirements are:

- A current unrestricted state medical license illustrating the expiration date.
- A record clear of any disciplinary action for an ethical or other offense as imposed by a state board of medical licensure within the past 5 years.
- Board certification in a specialty recognized by the American Board of Medical Specialists (ABMS) or the American Osteopathic Association (AOA), or documentation that applicant has been involved in the practice of medicine, including residency years, for a period of 5 years prior to submitting an ABIME application.
- Within the one year prior to taking the examination, completion of at least 15 hours of continuing medical education (AMA Category 1) in impairment rating and independent medical examination. (30 hours of CME in the field of impairment rating and independent medical examination are recommended.)
- Signed agreement to abide by the ABIME Guidelines of Conduct.

Confidentiality

Review of credentials for ABIME certification is completely confidential and privacy is protected. ABIME maintains only a list of ABIME Certified Independent Medical Examiners.

Fees

The American Board of Independent Medical Examiners has instituted the following fees to better support our educational mission. Price of the examination: First attempt is \$950.00 (US Funds). Examination retakes within a one-year period are \$475.00 (U.S.), all fees are non-refundable. A check or money order payable to ABIME must accompany the application. Credit card payments are also accepted (Visa, MasterCard, or Amex). Requests to transfer must be made in writing and received in the ABIME office 14 days prior to the examination date and there will be a \$50.00 charge for each transfer.

Certification/Directory

Upon successful completion of the examination, the applicant will receive a certificate stating that he or she has been found to possess special knowledge as a Certified Independent Examiner (CIME). Certified physicians are required to pay a fee of \$185 each year to be listed on the ABIME Board of Registry. The Board of Registry benefits include receipt of the Journal *Disability Medicine*, the physician's listing in the print and online directories, discounted rates on ABIME education programs, and eligibility for recertification through the alternate pathway. Candidates who have taken the examination will be notified of the results within 60 days of the examination date.

Application

Application requests may be directed to ABIME, 6470-A Merritts Creek Road, Huntington, WV 25702, or by calling (877) 523-1415. **We request, but do not require, that your application be sent at least two weeks prior to the exam date. Please call the ABIME office to request permission for late registration.**

ABIME reserves the right to cancel examinations based on registration numbers. Hotel reservations and travel arrangements are the sole responsibility of the examination registrant.

Recertification

Ongoing developments in this rapidly changing arena require a certification time limit. Therefore, certification is valid for a five-year period following date of issuance, at which time certification expires. Requirements for Recertification by examination include:

- A medical license, current and unrestricted;
- A record clear of any disciplinary action for an ethical or other offense as imposed by a state board of medical licensure within the past 5 years;
- Evidence of completion of additional impairment and disability evaluation continuing medical education;
- Signed agreement to abide by the ABIME Guidelines of Conduct; and
- Satisfactory completion of the then current examination or alternative pathway process.

Recertification by Alternate Pathway allows physicians to recertify by compiling points through a combination of continuing medical education courses and completion of Questions pertaining to articles listed in the ABIME Journal *Disability Medicine*.

Guidelines of Conduct

Each applicant must agree to comply with the ABIME Guidelines of Conduct.

EXAMINATION INFORMATION

Introduction

This booklet provides you with the information necessary to prepare for your upcoming examination by the American Board of Independent Medical Examiners (ABIME), including:

- General information
- Instructions
- Sample test items
- Knowledge, Skills and Abilities/Test Outline
- Bibliography

The examination lasts no more than 4 hours in duration and consists of 120 multiple choice test items, distributed by content area according to the test blueprint. The exam includes recall, interpretation, and problem solving types of questions. State-of-the-art psychometric procedures are employed for scoring and determination of the minimum passing level. Scores are based upon the total number of items answered correctly. There is no penalty for guessing.

ABIME recommends that applicants prepare adequately for the examination through readings, training, and experience.

Instructions

Admission

- Bring the ABIME examination confirmation letter with you to the examination room.
- Report to the examination room promptly at the registration time indicated on the letter. Verify your name and social security number with the information on the answer sheet you receive.

Materials

- All materials required to take the test (e.g., #2 pencils and applicable figures and tables from the AMA Guides to the Evaluation of Permanent Impairment) will be provided.
- You will not be permitted to bring any books, notes, electronic paging devices, recording or filming devices, radios, other mechanical and/or electronic devices, beverages, or food into the testing room.

Examination Procedures

- At the appointed time, the Chief Proctor will begin the examination with introductory remarks. These include reading the instructions and agreement form. You are required to follow proctor directions. You will receive an examination booklet immediately following the remarks.
- Read materials carefully and listen to directions given during the exam.
- Do not communicate with any other examinee during the examination. If you are detected attempting to provide or receive assistance, your test score will be invalidated.
- If you must leave the test room temporarily, your identity must be verified before you are readmitted. You will not receive additional testing time.

Finishing the Examination

- Upon completing the examination, check your work. Be sure any erasures are complete and there are no stray marks which could be counted as wrong answers.
- Once you submit the examination booklet and the answer sheet to the proctors, these materials will not be returned to you for additional review or completion.

Sample Test Items

The following are examples of the types of multiple-choice questions you will see on the exam. Answers follow.

1. 1. Which of the following statements about surgical treatment of sciatica from disk herniation is correct?

- a. Surgically treated patients have less pain and better function than non-operated patients at 1 year follow-up but not long term.
- b. An MRI showing disk bulge on the same side as a patient's sciatica predicts a high probability of complete pain relief with surgery.
- c. Failure to respond to 2 weeks of conservative treatment is an indication for surgery.

d. After disk surgery, there is strong evidence the patient should never lift more than 25 lbs.

2. 2. Which of the following is *not* characteristic of complex regional pain syndrome I (reflex sympathetic dystrophy)?

- a. Pain out of proportion to the degree of injury
- b. Autonomic dysfunction
- c. Abnormal nerve conduction studies
- d. Abnormal bone scan

3. Malingering:

- a. is another term for factitious disorder.
- b. may involve an unconscious motivation for symptoms associated with secondary gain.
- c. may lead to prosecution for fraud and should be diagnosed carefully.
- d. cannot exist in the presence of objective signs of injury.

4. According to the AMA Guides (5th Ed.), rating permanent impairment involves assessing a condition that is stable and not likely to change substantially over the next:

- a. 3 months.
- b. 6 months.
- c. 9 months.
- d. 12 months.

5. When measuring hip abduction, reliability can be increased by:

- a. measuring the patient in the supine position using an inclinometer.
- b. measurement in the prone position using a goniometer.
- c. consistent measurement from a well-defined starting position on each determination.
- d. measuring in the lateral decubitus position with the starting point in maximum adduction.

6. The Office of Workers Compensation Programs (OWCP) was established to manage claims arising out of the:

- a. Federal Employers Liability Act (FELA).
- b. Merchant Marine Act ("Jones Act").
- c. Social Security Administration.
- d. Federal Employees Compensation Act (FECA).

7. In a "slip and fall" personal injury suit against a restaurant involving a wrist fracture, the IME physician should:

- a. report on and be prepared to testify as to whether or not the floor condition was an unreasonable hazard.
- b. not report prior similar falls with successful suits, as that information is inadmissible.
- c. be prepared to testify according to, and cite in the report, Federal Rules of Evidence 25-29.
- d. record exams of central and lower extremity nervous system, cardiovascular evaluation including standing pulse and blood pressure

8. According to the AMA Guides (5th Edition), which of the following statements about range of motion measurements is incorrect? Range of motion measurements:

- a. can be excluded because of unexplained variance between passive and active motion.
- b. can be excluded if there is no patho-anatomic correlate.
- c. can be excluded if measurements between different evaluators vary by more than 10%.
- d. can be active or passive, depending on which is more consistent with clinical findings.

9. According to the AMA Guides (5th Edition), which of the following statements about rating impairment for spinal cord injuries is correct?

- a. Because delayed recovery is common, impairments should not be estimated until at least two years after injury, even in cases which present as complete spinal cord lesions.
- b. Impairments related to gait, use of upper extremities, respiration, bowel and bladder function, and sexual function are determined separately and then added to obtain the total whole person impairment.
- c. When impairments of trophic lesions, urinary calculi, osteoporosis, and reactive psychologic states occur in cord injured patients, the impairments should be rated separately and then combined with the spinal cord rating.
- d. Impairments related to gait, use of upper extremities, respiration, bowel and bladder function, and sexual function are calculated, then the highest rating from the categories becomes the final rating.

10. Electrodiagnostic studies are most likely to be abnormal in which one of the following disorder:

- a. mild sensory neuropathy.
- b. early motor neuropathy.
- c. acute radiculopathy.
- d. peripheral nerve injury.

Answers to sample items

- 1. Answer: a
- 2. Answer: c
- 3. Answer: c
- 4. Answer: d
- 5. Answer: c
- 6. Answer: d
- 7. Answer: d
- 8. Answer: d
- 9. Answer: c
- 10. Answer: d

Test Blueprint

The description of examination content areas and bibliography are provided as general guides to assist you in preparing for the ABIME examination. The knowledge, skills, and abilities of the examinee will be tested in the content areas listed. The areas are weighted by both their significance and frequency encountered in a typical independent medical examination. The percentage refers to the relative weighting of these areas on the exam.

1. Clinical Competency

25%

Candidates should demonstrate an understanding of pathophysiology, diagnostic evaluation (e.g., clinical history and interview process, physical examination and diagnostic studies), clinical management, health outcomes of neuro-musculoskeletal injuries, and familiarity with cardiopulmonary disease, neurological injuries, ear-nose-throat disorders, toxicology, controversial diagnoses, and other medical problems. The examination emphasizes clinical problems or situations encountered in performing independent medical examinations, or other types of “disability evaluations.”

- a. Musculoskeletal (e.g., spinal, upper extremity, lower extremity disorders)
- b. Cardiopulmonary (e.g., pulmonary function and cardiac stress testing)
- c. Neurological (e.g., head injury, peripheral nerve dysfunction)
- d. Ear-nose-throat (e.g., hearing loss, dizziness, facial disfigurement)
- e. Toxicology (e.g., heavy metals, chemical exposure)
- f. Controversial diagnoses (e.g., multiple chemical sensitivities, chronic fatigue syndrome)
- g. Diagnostic techniques (e.g., laboratory, x-ray imaging, electrodiagnostic studies)

2. Behavioral Science

10%

Candidates should demonstrate the ability to perform an assessment of behavioral disorders, to recognize the impact of behavior on injury, illness and disability, to recognize common psychiatric diagnoses and to assess appropriateness of care.

- a. Behavioral assessment (e.g., mental status exam, psychosocial assessment, clinical assessment of dangerous patients, interpretation of pain drawings, basic interpretation of psychological testing, recognition of non-physiologic findings)
- b. Psychiatric disorders (e.g., anxiety, organic brain syndromes, substance abuse, and personality, affective, and psychotic disorders)
- c. Pain disorders and psychological factors (e.g., malingering, somatization, symptom magnification, factitious disorders)

3. Impairment and Disability Assessment

25%

Candidates should demonstrate an understanding of the clinical assessment of functional ability, job demands, and definitions relevant to impairment disability evaluation.

- a. Definitions (activities of daily living, impairment, disability, restrictions, limitations)
- b. Functional abilities assessment (e.g., functional capacity evaluation, validity indicators, job analysis, fitness for duty)
- c. US Department of Labor: Classifications for Physical Demand Characteristics of Work
- d. Medical statistics and epidemiology (e.g., sensitivity, specificity, mean, standard deviation, predictive value, reliability, validity, study design)

4. Disability Systems

15%

Candidates should demonstrate an understanding of compensation systems (e.g., workers’ compensation, Social Security, other federal systems, and personal injury). Included in this section are medicolegal definitions, rules of evidence, role of expert witness, the process of deposition and testimony, the role of the independent medical examiner, liability issues, and ethical behavior.

- a. Workers’ compensation systems
- b. Social Security Administration
- c. Personal injury/tort
- d. Law and ethics
- e. Federal systems (e.g., Federal Employer’s Liability Act, Federal Employees’ Compensation Act)
- f. Americans with Disabilities Act – Title 1 (e.g., definitions, scope, reasonable accommodation, direct threat, undue hardship)
- g. Family and Medical Leave Act

5. AMA Guides to the Evaluation of Permanent Impairment and Report Writing

25%

Candidates should demonstrate an understanding of the AMA Guides to the Evaluation of Permanent Impairment, 5th Edition.

- a. Concepts, principles and report writing (e.g., whole person concept, adding versus combining, ADL's relationship to impairment, medical documentation, apportionment, causality, maximal medical improvement, components of a report, continuing care, future medical needs)
- b. Neuro-musculoskeletal impairment evaluation (e.g., spine [DRE versus ROM], upper extremity, lower extremity, peripheral nervous system, neurological system)
- c. Other systems (e.g., mental and behavioral, pain, cardiopulmonary)

ABIME Bibliography – Medical Exam

The following readings are suggested. In addition to the texts listed below, the examinee should be familiar with pertinent journal articles in the general domains of orthopedics, neurology, occupational medicine, physical medicine, rehabilitation, behavioral science, psychology, chronic pain, and disability. The examinee should be familiar with the test blueprint, and not limit readings to the following material.

Core Readings

Guides to the Evaluation of Permanent Impairment. 6th Ed., Chicago, IL: American Medical Association; 2008 (ISBN1-57947-888-9).

Suggested Readings

American Board of Independent Medical Examiners

AMERICAN BOARD OF INDEPENDENT MEDICAL EXAMINERS
EXAM REGISTRATION FORM ~Please Complete All Pages of Application

The American Board of Independent Medical Examiners (ABIME) requests careful and thorough completion of this application form. Incomplete applications or errors will result in delay and possible disqualification. **Applications MUST BE COMPLETED LEGIBLY and mailed or faxed to 304-733-5243.** Completed application, supporting documentation as outlined below and payment of examination fee must arrive in the ABIME office *no later than 2 weeks before the exam date* listed to guarantee exam registration.

Documentation required with the Application

Your file must be complete in order to receive exam results. The following items are required to complete your file:

1. Photocopy of medical degree or relevant diploma and current, and unrestricted medical license(s)/practitioner registration for the state/province/territory in which you practice and, if applicable, proof of ABMS Board Certification or other specialty certification.
2. Photocopy of a certificate of completion from an approved impairment and disability training program with at least 15 hours of continuing medical education.
3. Two passport size photos & Current Curriculum Vitae.

EXAM REFUND POLICY: (Please read carefully as registering for any ABIME event constitutes your acknowledgement of the following)

*Please take notice that for the ABIME exam fee is **non-refundable** after it is paid and can only be transferred to another exam location within the same calendar year. NO Substitutions are permitted. **NO Exceptions Please.** ABIME and its affiliates reserve the right to cancel or modify any activity for any reason with maximum liability of refund only of educational fees paid. ABIME and its affiliates hereby expressly disclaim any liability for damages incidental to or resulting from any cancellation or modification of any event. The laws of the state of West Virginia shall govern any disputes arising out of this agreement and venue shall lie exclusively in Cabell County, WV.*

Guidelines of Conduct:

Each doctor certified by the American Board of Independent Medical Examiners (ABIME) has agreed to comply with these guidelines of conduct:

Physicians should:

1. Be honest in all relevant communications;
2. Respect the rights of the examinees and treat them with dignity and respect;
3. At the medical examination:
 - a. Introduce himself/herself to the examinee as the examining physician;
 - b. Advise the examinee they are seeing him/her for an independent medical examination, and the information provided will be used in the assessment and presented in a report;
 - c. Provide the examinee with the name of the party requesting the examination, if requested;
 - d. Advise the examinee that no treating physician-patient relationship will be established;
 - e. Explain the examination procedure;
 - f. Provide adequate draping and privacy if the examinee needs to remove clothing for the examination;
 - g. Refrain from derogatory comments; and
 - h. Close the examination by telling the examinee that the examination is over and ask if there is further information the examinee would like to add.
4. Reach conclusions that are based on facts and sound medical knowledge and for which the examiner has adequate qualifications to address;
5. Be prepared to address conflict in a professional and constructive manner;
6. Never accept a fee for services which are dependent upon writing a report favorable to the referral service; and
7. Maintain confidentiality consistent with the applicable legal jurisdiction.

ABIME Release Statement:

In connection with this application, I enclose herewith the examination fee and wish to be registered for the American Board of Independent Medical Examiners (ABIME) upcoming exam as indicated with this application. I agree to comply with established examination administrative procedures and policies including the refund policy of ABIME.

I further agree (i) to indemnify and hold harmless each and all of the members, trustees, officers, examiners and agents of ABIME from and against any liability whatsoever in law or in equity with respect to any act or omission in connection with this application, such examination, the grades given upon such examination, and/or granting or issuance of or failure to grant or issue a certificate; and (ii) that any certificate which may be granted and issued shall be and remain the property of the American Board of Independent Medical Examiners. I acknowledge that as a candidate for the ABIME certification, I am under the obligation to inform the American Board of Independent Medical Examiners of any change in material eligibility status subsequent to the submission of this application.

I warrant that each of the statements made in support of this application are true and correct.

I hereby authorize ABIME to request information from organizations referred to in this application, and to verify academic and/or clinical training and licensure deemed necessary to make a determination of my eligibility.

More over, my signature below is an affirmative that I agree to abide by the Polices, Procedures and the ABIME Guidelines of Conduct:

Signature: _____ **Date:** _____

After completing all pages of this application, include payment and mail or fax, along with a copy of your Current and Unrestricted Medical License and Current Curriculum Vitae to:

American College of Disability Medicine & American Board of Independent Medical Examiners
Joint Sponsored by Marshall University Joan C. Edwards School of Medicine

Presents

Segment One – 15 hrs AMA Category 1 CME Credit
AMA Guides 6th Ed. to the Evaluation of Permanent Impairment
Training Course and Certification Review

Cost: \$795.00 US Funds

Course #RVW

Intended Audience: Physicians from a variety of Specialties

Presented By:

Mohammed I. Ranavaya, MD, JD, MS, FFOM, FRCPI, CIME: Dr. Ranavaya is a Professor of Occupational and Environmental Medicine at the Marshall University School of Medicine in West Virginia.

Robert D. Rondinelli, MD, PhD: Is board certified in Physical Medicine and Rehab. He is editor in chief of the AMA Guides 6TH Ed.

Kathryn L. Mueller, MD, MPH, CIME: Dr. Mueller works for the National Jewish Medical Center in Denver, Colorado and is one of the founding members of ABIME. Dr. Mueller is board certified in Occupational Medicine.

Gerald S. Steiman, MD., CIME: Is board certified in Neurology. He has over 25 years experience in clinical practice of Neurology.

This course is specifically designed to educate and prepare physicians in the use of the AMA Guidelines to the Evaluation of Permanent Impairment, 6th edition.

Educational Objectives

- At the conclusion of this learning activity, participants should be able to:
- Describe the knowledge content related to the A MA Guides 6th Edition.
- Discuss new developments in the A MA Guides 6th Edition.
- Differentiate symptoms, pathology, impairment, function and disability
- Explain the fundamentals of quality disability evaluation services
- Relate clinical data to case issues and discuss skills needed to perform evaluations
- Perform musculoskeletal permanent impairment ratings according to the AMA Guides to the Evaluation of Permanent Impairment.
- Utilize skills to perform complex case evaluations of musculoskeletal pain disorders
- Explain the use of other chapters of the AMA Guides 6th Edition.
- Define the steps needed to implement the use of the AMA Guides 6th Edition in your practice.

Practical Objectives

- Perform impairment evaluations according to the AMA Guides 6th Edition.
- Demonstrate skills in evaluating complex cases
- Evaluate and manage difficult impairment evaluations patients
- Perform excellent independent medical evaluations
- Provide IME services and serve as an expert medical witness
- Improve the quality of medical reports

PROGRAM SCHEDULE: A comprehensive review of the AMA Guides to the Evaluation of Permanent Impairment, 6th ed.

Day 1

7:00 a.m. Registration and Continental Breakfast

7:30 a.m. **Welcome & Introduction** and review of course objectives

7:45 a.m. Key concepts, philosophy and underlying principles of the AMA Guides, **Chapters 1 and 2**

9:45 a.m. Morning Refreshment Break

10:00 a.m. **Spine Impairment Rating** with Case Presentation

12:15 p.m. Lunch and learn with the faculty, Questions/Answers, Discussion

1:15 p.m. **Upper Extremities Impairment Rating** with Case Presentations

3:00 p.m. Afternoon break

3:15 p.m. **Lower Extremities Impairment Rating**

4:00 p.m. **Beyond Musculoskeletal Systems**, An overview of Chapters 4-12 of the AMA guides and non-musculoskeletal systems mock questions

6:00 p.m. Adjourn

Day 2

7:00 a.m. Registration and Continental Breakfast
7:30 a.m. More AMA Guides 6th Edition Case Presentations
8:30 a.m. A primer on Biostatistics, controversial diagnoses and other issues on the exam
9:00 a.m. What is the ABIME exam about? An introduction and some tips for MCQ exams
9:30 a.m. Mock exam questions and practice
10:00 a.m. Morning Refreshment Break
10:15 a.m. Impairment Rating of the **Nervous System**
11:00 a.m. Impairment Rating for **Mental and Behavioral Disorders**
12:15 a.m. Impairment Rating for **Pain**
1:00 p.m. Adjourn

***The International Program differs slightly from the above schedule.**

This activity has been planned and implemented in accordance with the Essential Areas and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint sponsorship of Marshall University Joan C. Edwards School of Medicine and ACDM/ABIME. Marshall University Joan C. Edwards School of Medicine is accredited by the ACCME to provide continuing medical education for physicians.

Marshall University Joan C. Edwards School of Medicine designates this educational activity for a maximum of 39 AMA PRA Category 1 Credit(s)™. Physicians should only claim credit commensurate with the extent of their participation in the activity. Segment registration and attendance verification are required.

Segment Two – 8 hrs AMA Category 1 CME Credit

A Doctor's Guide to Practical Use of the AMA Guides to the Evaluation of Permanent Impairment 5th Edition– An Overview

Cost: **\$495.00 US Funds**

Course # **OVW**

Intended Audience: Physicians from a variety of Specialties

Presented By:

Mohammed I. Ranavaya, MD, JD, MS, FACPM, CIME: Dr. Ranavaya is a Professor of Occupational and Environmental Medicine at the Marshall University School of Medicine in West Virginia.

Kathryn L. Mueller, MD, MPH, CIME: Dr. Mueller works for the National Jewish Medical Center in Denver, Colorado and is one of the founding members of ABIME. Dr. Mueller is board certified in Occupational Medicine.

Robert D. Rondinelli, MD, PhD: Is board certified in Physical Medicine and Rehab. He is editor in chief of the AMA Guides.

Gerald S. Steiman, MD., CIME: Is board certified in Neurology. He has over 25 years experience in clinical practice of Neurology.

Faculty does not have any disclosures to make

This course is specifically designed to educate and prepare physicians in the use of the AMA Guidelines to the Evaluation of Permanent Impairment.

Educational Objectives

At the conclusion of this learning activity, participants should be able to:

- Perform an independent medical evaluation based on the AMA Guides 5th Edition.
- Explain and present the differences between impairment, function and disability.
- Discuss the critical steps involved in the impairment evaluation using the AMA Guides in clinical practice.
- Describe the knowledge content related to the AMA Guides 5th Edition.
- Discuss new developments in the AMA Guides and explain the main differences between the various editions of the AMA Guides.
- Relate clinical data to case issues and perform evaluations.
- Perform musculoskeletal permanent impairment ratings according to the AMA Guides 5th Edition.
- Explain the use of internal medicine, pain and psychiatric chapters of the AMA Guides.

This activity has been planned and implemented in accordance with the Essential Areas and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint sponsorship of Marshall University Joan C. Edwards School of Medicine and ACDM/ABIME. Marshall University Joan C. Edwards School of Medicine is accredited by the ACCME to provide continuing medical education for physicians.

Marshall University Joan C. Edwards School of Medicine designates this educational activity for a maximum of 39 AMA PRA Category 1 Credit(s)™. Physicians should only claim credit commensurate with the extent of their participation in the activity. Segment registration and attendance verification are required.

Segment Three – 4 hrs AMA Category 1 CME Credit

Medicolegal Issues for Independent Medical Examiners and Expert Witness: A Workshop

Facilitator: Prof. Mohammed I. Ranavaya, MD, MS, JD, FFOM, FRCPI, CIME

4 hours of AMA Category 1 CME. Educational Tuition is **US \$295**. Course # **MLG**. Intended Audience: Physicians of all specialties. Others who would benefit from this workshop include physicians' assistants and nurse case managers.

This 4-hour workshop is designed to teach physicians who perform independent medical examinations and serve as expert witnesses the skills critical to effectively deal with lawyers and the legal system.

COURSE OBJECTIVES:

- Increase effectiveness in practice through a better understanding of the disability and compensation systems and the related law in the US.
- Learn the critical steps involved in providing medical expert witness and independent medical examination services.
- Understand the liabilities and risks for independent medical examiners and how to manage those risks.
- Learn essential skills for deposition and other testimony in court.
- Improve the knowledge of medicolegal considerations for independent medical examiners.

This activity has been planned and implemented in accordance with the Essential Areas and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint sponsorship of Marshall University Joan C. Edwards School of Medicine and ACDM/ABIME. Marshall University Joan C. Edwards School of Medicine is accredited by the ACCME to provide continuing medical education for physicians.

Marshall University Joan C. Edwards School of Medicine designates this educational activity for a maximum of 39 AMA PRA Category 1 Credit(s)™. Physicians should only claim credit commensurate with the extent of their participation in the activity. Segment registration and attendance verification are required.

Segment Four – 4 hrs AMA Category 1 CME Credit

Clinical Practice Evidence Based Guidelines

Facilitator: Kathryn L. Mueller, MD, MPH, FACOEM, CIME

4 hours of AMA Category 1 CME - Educational Tuition is **US \$295** - Course# **CPG** - Audience: Physicians from a variety of Specialties

This course is specifically designed to educate and prepare physicians in the use of the Clinical Practice Evidence Based Guidelines

COURSE OBJECTIVES

At the conclusion of this learning activity, participants should be able to:

- State at least 5 characteristics of quality evidence-based clinical practice guidelines.
- Apply these characteristics to an existing guideline and properly identify the guideline's weaknesses and strengths.
- Describe the basic practice principles in the ACOEM clinical practice guidelines.
- Explain the ACOEM clinical practice guideline recommendations for spinal surgery, discograms, and spinal cord stimulators and apply them to case examples.
- List the requirements for medical management of chronic pain and opioid use in non-malignant pain per the ACOEM clinical practice guidelines

This activity has been planned and implemented in accordance with the Essential Areas and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint sponsorship of Marshall University Joan C. Edwards School of Medicine and ACDM/ABIME. Marshall University Joan C. Edwards School of Medicine is accredited by the ACCME to provide continuing medical education for physicians.

Marshall University Joan C. Edwards School of Medicine designates this educational activity for a maximum of 39 AMA PRA Category 1 Credit(s)™. Physicians should only claim credit commensurate with the extent of their participation in the activity. Segment registration and attendance verification are required.

Segment Five – 4 hrs AMA Category 1 CME Credit
Causation In Medicolegal Claims, What does the science say? A Workshop

Facilitator: Kathryn L. Mueller, MD, MPH, FACOEM, CIME

4 hours of AMA Category 1 CME - Educational Tuition is **US \$295** - Course# **CAS** - Audience: Physicians from a variety of Specialties

This course is specifically designed to educate and prepare physicians in the use of the AMA Guidelines to the Evaluation of Permanent Impairment.

COURSE OBJECTIVES

At the conclusion of this learning activity, participants should be able to:

- Define standards for causality used in medical legal contexts
- Interpret medical evidence and scientific literature for causality analysis
- Apply steps for the medical legal causality analysis to cumulative trauma and other controversial cases
- Discuss the difficulties in interpreting common degenerative disease findings as causally based using spinal injuries as case examples

This activity has been planned and implemented in accordance with the Essential Areas and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint sponsorship of Marshall University Joan C. Edwards School of Medicine and ACDM/ABIME. Marshall University Joan C. Edwards School of Medicine is accredited by the ACCME to provide continuing medical education for physicians.

Marshall University Joan C. Edwards School of Medicine designates this educational activity for a maximum of 39 AMA PRA Category 1 Credit(s)™. Physicians should only claim credit commensurate with the extent of their participation in the activity. Segment registration and attendance verification are required.

Segment Six – 4 hrs AMA Category 1 CME Credit
How to Write Winning Reports Workshop

Facilitator: Prof. Mohammed I. Ranavaya, MD, MS, FFOM, FRCPI, CIME

4 hours of AMA Category 1 CME. Educational Tuition is **US \$295**. Course # **RPT**. Intended Audience: Physicians of all specialties.

This 4-hour workshop is designed to focus on the skills necessary to write winning reports in the medicolegal arena. Learn the necessary skills from an expert who has written thousands of persuasive IME reports.

COURSE OBJECTIVES

This 4 hour seminar will discuss how to write a report that

- Communicates information that readers need.
- Presents information accurately and convincingly.
- Establishes your credibility and professionalism to a reader.
- Structures material so readers can find information quickly and easily.
- States key points clearly and without ambiguity so that readers can understand your meaning.
- Uses language and sentence structure that lay readers can follow.

This activity has been planned and implemented in accordance with the Essential Areas and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint sponsorship of Marshall University Joan C. Edwards School of Medicine and ACDM/ABIME. Marshall University Joan C. Edwards School of Medicine is accredited by the ACCME to provide continuing medical education for physicians.

Marshall University Joan C. Edwards School of Medicine designates this educational activity for a maximum of 39 AMA PRA Category 1 Credit(s)™. Physicians should only claim credit commensurate with the extent of their participation in the activity. Segment registration and attendance verification are required.
